**PLEASE  
EXERCISE  
CAUTION  
WHEN  
HANDLING THE  
BLADE. ZEUS  
RECOMMENDS  
SLITTING BOTH  
ENDS OF  
FluoroPEELZ™  
PRIOR TO  
RECOVERY.**

### Nothing compares to one simple tear with FluoroPEELZ™.

The following are procedures recommended for using the slit fixture. Deviations from these procedures may result in injury and / or excess waste. Users should also review their company safety rules and applicable safety laws and regulations.

**SPECIAL NOTE:**

Hole sizes can be laser marked  
for identification.

### To install a new blade:

1. Cut-resistant gloves should be worn
2. Loosen the two blade retaining screws from the side of the fixture.
3. Remove blade from the fixture and discard in a sharps container.
4. Lightly tighten the two blade retaining screws to secure the new blade in the fixture.

### To Slit part:

1. Insert the FluoroPEELZ™ tube into the smallest hole that it will fit freely.
2. Push the FluoroPEELZ™ into the blade until it hits the back of the razor blade and stops.
3. Remove the slit FluoroPEELZ™ from the fixture.

### To Peel (Post-Recovery):

1. Firmly grasp one side of the slit FluoroPEELZ™ in each hand.
2. Pull each half of the FluoroPEELZ™ away from each other in a manner that is perpendicular to the catheter; pull steadily with an even motion removing equal amounts of FluoroPEELZ™ in each hand.
3. Stop and re-grasp FluoroPEELZ™ nearer to the catheter as needed to maintain even and steady removal.
